

MISSION:

To advance Indiana's economic prosperity, health and quality of life.

Purdue's Manufacturing Extension Partnership (MEP) provides high value, affordable solutions to help businesses increase profitability. As advocates for Indiana's thousands of manufacturers, our staff leverages resources in both the public and private sectors to help identify areas of improvement, streamline processes, and ultimately increase competitiveness.

Our MEP services help your business reach its goals by:

- Objective assessments that identify priority-improvement targets in workforce, manufacturing, plant, engineering, and office processes.
- Integrated project implementation and management— your team and ours working toward the same goal.
- Customized Purdue certificate and certification training curriculum for associates, engineers, and management.

"Purdue is helping us invest in our company's most valuable asset: our people. The training has educated and developed our employees in eliminating waste and creating ongoing improvements. I see progress with Purdue MEP."

- Brian Reichart, Red Gold president & CEO

Solutions for Success

- **Lean Manufacturing:** Learn how to reduce waste, increase productivity, and achieve higher quality products.
- **Lean Office:** Eliminate non-value-added activities from a company's processes while streamlining its value-added activities.
- **Quality and Environmental Improvement:** Improve quality and reduce waste with an effective Quality Management System.
- **Six Sigma Certification:** Increase your company's skills in process optimization and continuous improvement.
- **Training Within Industry (TWI):** Team leaders learn how to increase productivity, improve morale, and reduce training time.
- **Green Enterprise Development:** Learn how to apply sustainable, environmentally friendly practices in the workplace.
- **Top Line Business Growth:** Discover new ideas for profitable growth, add new markets, and new products to your business.
- **Energy Efficiency & Sustainability:** Learn ways to decrease energy usage and reduce energy costs.
